BUILDING FEES

Determination of Valuation for Fee-Setting Purposes

- Project valuations shall be based on the total value of all construction work, including all finish work, roofing, electrical, plumbing, heating, air conditioning, elevators, fire-extinguishing systems and any other permanent equipment. If, in the opinion of the Building Official, the valuation is underestimated on the application, the permit shall be denied, unless the applicant can show detailed estimates to meet the approval of the Building Official. Final building permit valuation shall be set by the Building Official. For determining project valuations for new construction, the Building Official may use data published by the International Code Council (ICC) (building valuation data table, typically updated in February and August of each year). The final building permit valuation shall be set at an amount that allows the City to recover its costs of applicant plan check, permit and inspection activities.

Note: For construction projects with permit fees calculated using Section B, C, D, or E, additional fees apply for permit processing. Additional fees may apply for services provided by other City Departments (e.g. Planning Review), Technology Enhancement Fees, and Fees Collected on Behalf of Other Agencies (e.g. State of California). Additional fees apply for plan review, when applicable.

B. Permit Fee for New Buildings, Additions, Tenant Improvements, Residential Remodels, and Combined Mechanical, Electrical, and/or Plumbing Permits

Total Valuation		Permit Fee

Clarification of Fee Structure Application for Permit Fees

Assigned project valuation for fee-setting purposes is intended to correlate to the typical level of inspections required. The example provided below is applicable to stand-alone trade permits:

Valuation Up to \$2,000 = 1 inspection typically required (.5 hours)

Valuation \$2,001 - \$4,000 = 2 inspections typically required (1 hour)

Valuation \$4,001 - \$10,000 = 2 to 4 inspections typically required (1 - 2 hours)

Valuation \$10,000 and Up = 4 or more inspections typically required (2 or more hours)

Additional fees will apply for permit processing and plan review, as required

Building Permit fees are also established to correspond to the typical level of inspections required.

City of Oakdale

PLANNING FEES

Activity Description	Fixed Fee or Minimum Fee	Initial Deposit	Charge Basis	Note
Overview of Fee Structure				
Fees may be either fixed fees, deposits, or deposits with a minimum fee amount due. When a fee is deposit-based, the City will collect the initial deposits and bill against that deposit. The minimum total amount charged for deposit-based fees shall be the amount shown in the minimum fee column.				
Full Cost Deposits and Deposit Replenishment				
Applicants for full cost (deposit-based) submittals shall pay for all City staff and contract service provider time and materials required to process the application. A full cost reimbursement agreement shall be included with the project application submittal package. Projects outside the scope of this fee schedule will be subject to a full cost reimbursement agreement to be approved by the City Manager and/or City Council. This reimbursement agreement will include the identification of a work program and will include cost estimates for both City staff time and consultant services based on a defined scope of work.				
Initial deposits will be collected and held by the City in a deposit account at the time the application is submitted. Project billing amounts will be drawn from the deposit account. A positive account balance shall be maintained at all times during the review process. No work will be performed on a project with a negative fund balance. If the deposit is reduced to below 20% of the initial deposit amount, the applicant will be notified and required to supplement the deposit account with an additional amount no less than 50% of the original deposit.				
Funds expended for staff time shall not be dependent upon the City's approval or disapproval of the application request. Any deposit amounts remaining after final project close out will be returned to applicant (less bond amounts held by the City).				
As may be required for project evaluation or environmental review, all payment for consultant work shall be the responsibility of the applicant.

Notes:

Deposit amounts listed are typical minimum amounts. The City reserves the right to request a different deposit (lower or higher) based on complexity of project or frequency of inspections needed.

The Civil Improvement (Fine Grading) Permit shall include an encroachment permit for all required improvements identified through the Planning process.

If deposit base permit is required, all inspection fees will be paid out of the deposit at Time & Materials + 15%.

[a] For combination driveway, curb, gutter, sidewalk permits to be inspected at same time, only use driveway permit for fee calculation.

[b] General encroachment work includes any activity within the public right of way. Fixed fee permit applies to typical utility work with standard WATCH manual traffic control. More complex work requiring additional plan check/traffic control, plan review, testing, and/or inspection, requires a deposit.

LAND DEVELOPMENT ENGINEERING AND ENCROACHMENT FEES

Activity Description	Fixed Fee or Minimum Fee	Initial Deposit	Charge Basis	Note
Overview of Fee Structure				
Fees may be either fixed fees, deposits, or deposits with a minimum fee amount due. When a fee is deposit-based, the City will collect the initial deposits and bill against that deposit. The minimum total amount charged for deposit-based fees shall be the amount shown in the minimum fee column.				
Full Cost Deposits and Deposit Replenishment				
Applicants for full cost (deposit-based) submittals shall pay for all City staff and contract service provider time and materials required to process the application. A full cost reimbursement agreement shall be included with the project application submittal package. Projects outside the scope of this fee schedule will be subject to a full cost reimbursement agreement to be approved by the City Manager and/or City Council. This reimbursement agreement will include the identification of a work program and will include cost estimates for both City staff time and consultant services based on a defined scope of work.				
Initial deposits will be collected and held by the City in a deposit account at the time the application is submitted. Project billing amounts will be drawn from the deposit account. A positive account balance shall be maintained at all times during the review process. No work will be performed on a project with a negative fund balance. If the deposit is reduced to below 20% of the initial deposit amount, the applicant will be notified and required to supplement the deposit account with an additional amount no less than 50% of the original deposit.				
Funds expended for staff time shall not be dependent upon the City's approval or disapproval of the application request. Any deposit amounts remaining after final project close out will be returned to applicant (less bond amounts held by the City).				
As may be required for project evaluation or environmental review, all payment for consultant work shall be the responsibility of the applicant.
