Subject: Second hand smoke ordinance
Date: Sunday, October 17, 2021 11:43:50 AM

Hello,

I would like to ask that the city of Oakdale put in a second hand smoke nuisance ordinance.

People are more than welcome to smoke what they want (cigarette/marijuana) but I am asking that this be put into place to protect those who do not smoke and should not have to suffer the consequences of that smoke- especially the health of children. This includes but is not limited to the health risks of the second hand smoke, the smell, the damage it does to the homes of others (and the toxins stay in the walls for years) and the overall frustration of not being able to use your own home and yard the way you want because of the smoke.

At this moment there is nothing law enforcement can do to help families suffering with this issue no matter how much they want to. For a real example: the most they can do is speak to the person smoking all day long outside a child's bedroom and ask them not to smoke there, which ends up creating more smoke eventually and no consequences for the person smoking.

As I previously mentioned in my email to Curtis Haney, a home and yard should be a safe and comforting place. If you are constantly being bombarded with second hand smoke it is toxic to your family and your home and definitely not comforting.

Sincerely,

A very frustrated and stressed out parent,

Amanda Fritz
